- Active research community: 8 main universities with many interactions and collaborations

Why HKUST?

- Research university: World-class faculties
- Supervision: Flexible and supportive
- Community: Collaborations among students and faculties

Really want a PhD?

- Love research? Or you do not want to work?
- **STRONG** motivation: Research should not be mentally-detrimental to you.
- Physical and mental health: Research is a long-term commitment.

What a PhD needs? From a MBTI perspective

- Introvert vs Extrovert

Introvert for doing research along; Extrovert for presentation, socializing, and collaboration.

- Sensing vs Intuition

Sensing for doing research step by step; Intuition for innovative ideas.

- Thinking vs Feeling

Thinking for logical reasoning; Feeling for emotion management.

- Judging vs Perceiving

Judging for planning and organization; Perceiving for flexibility and adaptability.
